

CLEAResult ATLAS™ | Academy

Efficiency evolves with education.

The best way to ensure a cleaner, more energy-efficient future is through education. In every community, regardless of size, there are customers and trade allies ready to learn and explore all the opportunities energy efficiency has to offer—and now there's a way to teach them. With CLEAResult ATLAS™ Academy, you can continuously grow your community's energy efficiency know-how, raising customer satisfaction and environmental impact across the board.

We help you train the energy experts of tomorrow.

When we invest in educating and training our communities and program participants with the resources they need to use energy more efficiently, results for our environment and your bottom line follow fast. CLEAResult ATLAS™ Academy's expansive data framework lets you connect customers, distributors and trade allies to valuable content and courses that accelerate energy savings, and confidence, for everyone.

1 Develop your community.

Ensure continuous workforce development with CLEAResult ATLAS™ Academy. Our vast database offers training courses on prompt and proper installation of all energy efficiency products, from LED lighting to smart thermostats, as well as higher-level courses on how more complex energy systems can transition to a cleaner future.

2 Reinforce clean energy education.

Building communities that understand the impact of clean energy usage is a valuable asset in the fight against climate change. Allowing customers and trade allies to discover energy-saving techniques in the methods that are accessible to them enables change that improves energy reduction over time.

3 Engaging content from the experts.

When people have confidence in their energy efficiency choices and trusting relationships with local energy providers and installation contractors, they report higher levels of satisfaction with programs as a whole. CLEAResult ATLAS™ Academy encourages everyone in your community to actively participate in our changing energy landscape and make the changes necessary to build an environmentally sustainable world.

Course content includes, but is not limited to:

- ✓ Trade ally assessment training
- ✓ Window insulation
- ✓ Attic insulation
- ✓ Showerhead installation
- ✓ Faucet aerators

Powering our six transformative practices

Energy Efficiency

Easy ways for customers to use less energy.

Strategic Energy Management

Holistic strategies for long-term energy savings.

Energy Transition

Increase and scale clean energy adoption.

Design Build

Simple solutions to complex energy challenges.

Carbon Consulting

Create, reach and surpass environmentally sustainable goals.

Testing and Certification

Ensure confidence in the equipment you buy.

We change the way people use energy, *for everyone.*
